# DSSA
DIGITAL SWITCHING SYSTEMS AUSTRALIA

The POWERKEY 400 is in the family of keypads that gives a more traditional switch appearance to the panel. There is one indicator for every button, which is on when the corresponding function is on.

The POWERKEY 400 also offers vast flexibility to the OEM and end user. The Re-legendable Keypads have a pocket above each button that accepts a clear plastic insert. The insert can be silk screened or pad printed with text or symbols. All inserts are supplied blank. This unique keypad allows for customers to customise keypads on their own production floor. A versatile choice for all your needs.

STANDARD FEATURES:
- ➤ "Plug & Play" Installation
- ➤ Backlit for night viewing
- ➤ Available in 8Gang
- ➤ Customisable Inserts
